

My recommendation for future students at YNU

Exchange Semester Experience Fall2025 & Spring2026

University of Granada, Spain

Being a student at YNU was an extraordinary experience so far. For instance, I want to mention the good professors that are part of the University, as well as the staff at the Student Center, they were always there to lend me a hand when I needed. Also, the campus is unbelievable, very big and green (it feels like a forest).

Besides, I wanted to point out the best classes I've ever had to learn a language, in this case Japanese language. The way of teaching it was great, and the way it is organized by levels makes it so easy to understand and very intuitive to not feel overwhelmed. You can even choose between intensive courses, integrated or just specific parts, such as kanji, reading or speaking. It was my favorite thing at the University.

Additionally, I want to recommend the cafeterias and the COOP store. These make my days way better. The meals at the cafeteria are very cheap and delicious, with a lot of variety. On the other hand, the COOP store and the convenience store (Lawson) are very convenient for buying some quick food, books or even merchandising from the University.

Finally, I just want to thank my home university and Yokohama National University to give me this opportunity that I won't ever forget. Japan changed my mind set and my vision of the world in a way I could not imagine. I came here with no expectations, and I will leave with a lot of good memories and experiences, and also with a couple of people that I now consider my true friends. And for that I am very grateful.
